

**BIBA WANTS TO HELP YOU STAY SAFE
THIS HURRICANE SEASON.**

BE PREPARED!

- Know** your risk exposure to hurricane related damage. Survey your property for flooding possibility and prepare accordingly.
- You** should have a hurricane evacuation kit, including your important documents in a water-proof bag, and enough food and water to last 3 to 5 days.
- Trim** or remove excess trees and branches from around your home, especially those near your roof.
- Ensure** your roof has no areas of vulnerability, such as loosen facia boards, shingles and rain gutters.
- Make** sure storm shutters are installed properly and in place with the appropriate clips.
- Review** your property insurance policy to ensure you have catastrophe (hurricane) cover with adequate replacement values.
